

## **SolutionInc Limited and Elfiq Networks enter Worldwide Distribution Partnership**

December 15, 2009 – Montreal, QC and Halifax, NS: Elfiq Networks, the leading manufacturer of innovative link balancing solutions and SolutionInc Limited (TSX-VEN:STL), maker of patented and award-winning Internet gateway systems announced today they have entered into a worldwide distribution partnership. Under this partnership, SolutionInc will distribute Elfiq's link balancing solutions to new and existing customers, resellers and partners in both the hospitality and broadband carrier industries across the globe.

"Partnering with SolutionInc allows Elfiq to expand our presence in new geographical markets and provide our solutions to new customers in the hospitality sector, where bandwidth management is a major growing concern and thus our solutions are increasingly valuable in raising guest satisfaction scores and lowering operational telecommunications costs," said JP Hebert, Vice President of Business Development at Elfiq.

Elfiq's link balancing solutions will complement SolutionInc's family of patented SolutionIP™ gateways, enabling the provision of total guest-based Internet solutions with a proactive bandwidth management component. "Elfiq's products are an excellent addition to our existing offering, and their customer centered culture of innovation aligns perfectly with SolutionInc's commitment to providing advanced solutions and outstanding services and support," said Kevin Martin, VP of Professional Services and Customer Care at SolutionInc Limited.

The Elfiq Link Balancer product line enables organizations of all sizes to use and manage multiple concurrent Internet Service Provider and private circuits simply and securely to balance the traffic load to meet and exceed their bandwidth needs, avoiding over-stressing the network. Bandwidth management is an increasing concern in visitor-based networks, as guest and end-user demand for bandwidth-heavy applications continues to grow.
