FOR IMMEDIATE RELEASE

Elfiq Networks to release new SD-WAN features for Elfiq Central, including increased VPN capacity and centralised DPI intelligence

Las Vegas (Nevada), April 11, 2017 — Elfiq Networks, leader in link balancing and bandwidth optimization solutions, is strengthening its position as a **SD-WAN** pioneer by further diversifying its product line. The announcement was made at Channel Partners Conference and Expo in Las Vegas. Among the products announced at the event are new performance licenses for VPN and DPI, which will be subscription-based and available through distribution.

“Our channel partners will be happy to learn that we are improving our capacity to support VPN between sites,” said Frederick Parent, Chief Technology Officer at Elfiq Networks. “Our new licenses can enable unlimited VPN traffic within the end-user’s network capacities, a feature that no other SD-WAN provider can claim to offer.”

Elfiq Networks was also happy to announce that its advanced Deep Packet Inspection module, will also be available as a component of SD-WAN deployments, powering advanced reporting and management options through the company’s centralised management platform, Elfiq Central.

With these new additions to its product line, Elfiq Networks is making it easier for partners wishing to enter the SD-WAN market, expected to grow to 9 billion dollars worldwide by 2021, by providing them with key differentiating features. Elfiq Networks will be exhibiting its products and solutions at the Channel Partners Conference & Expo, April 10th to 13th, 2017.

About Elfiq Networks

Elfiq Networks (Elfiq Inc.) enhances network performance and business continuity through innovative link balancing, cloud computing and bandwidth management technologies. Using Elfiq Networks Link Balancers, companies can leverage simultaneous ISPs, mix public and private links for added flexibility, seamless failover, increased throughput and smarter WAN path selection. Every day, local and global organizations of all sizes and verticals rely on Elfiq Networks’ Link Balancers and advanced network solutions. For more information, visit www.elfiq.com/SDWAN.
